

# WEBINAR SERIES 2022

## Outsourcing of engineering work: Success factors for precast companies

Susanne Schachinger  
Area Sales Manager | Competence Center Allplan Precast

May 12th, 2022

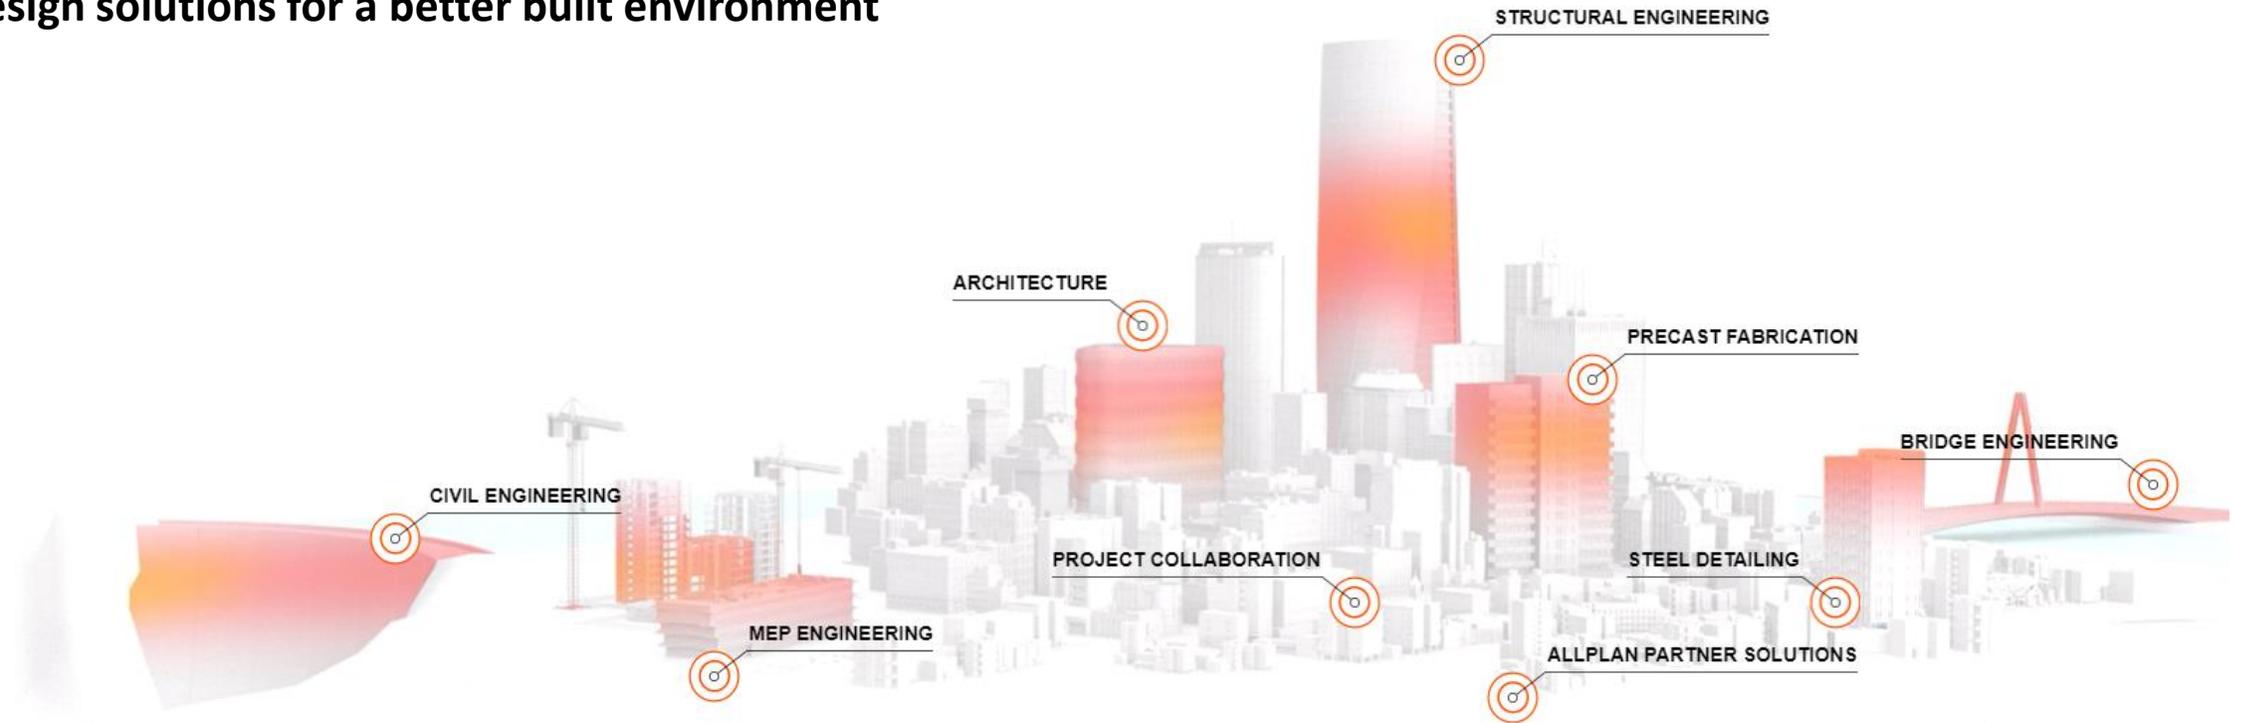

# AGENDA

- › **ALLPLAN:** Design to Build | Design to Manufacture
- › **Reasons** for outsourcing engineering work | Typical **challenges**
- › Precast manufacturer's **requirements** towards engineers
- › Success factors | How the right **software tools** help you to **outsource successfully**
- › About us: **Competence Center Allplan Precast**

# ALLPLAN DESIGN TO BUILD

Design solutions for a better built environment

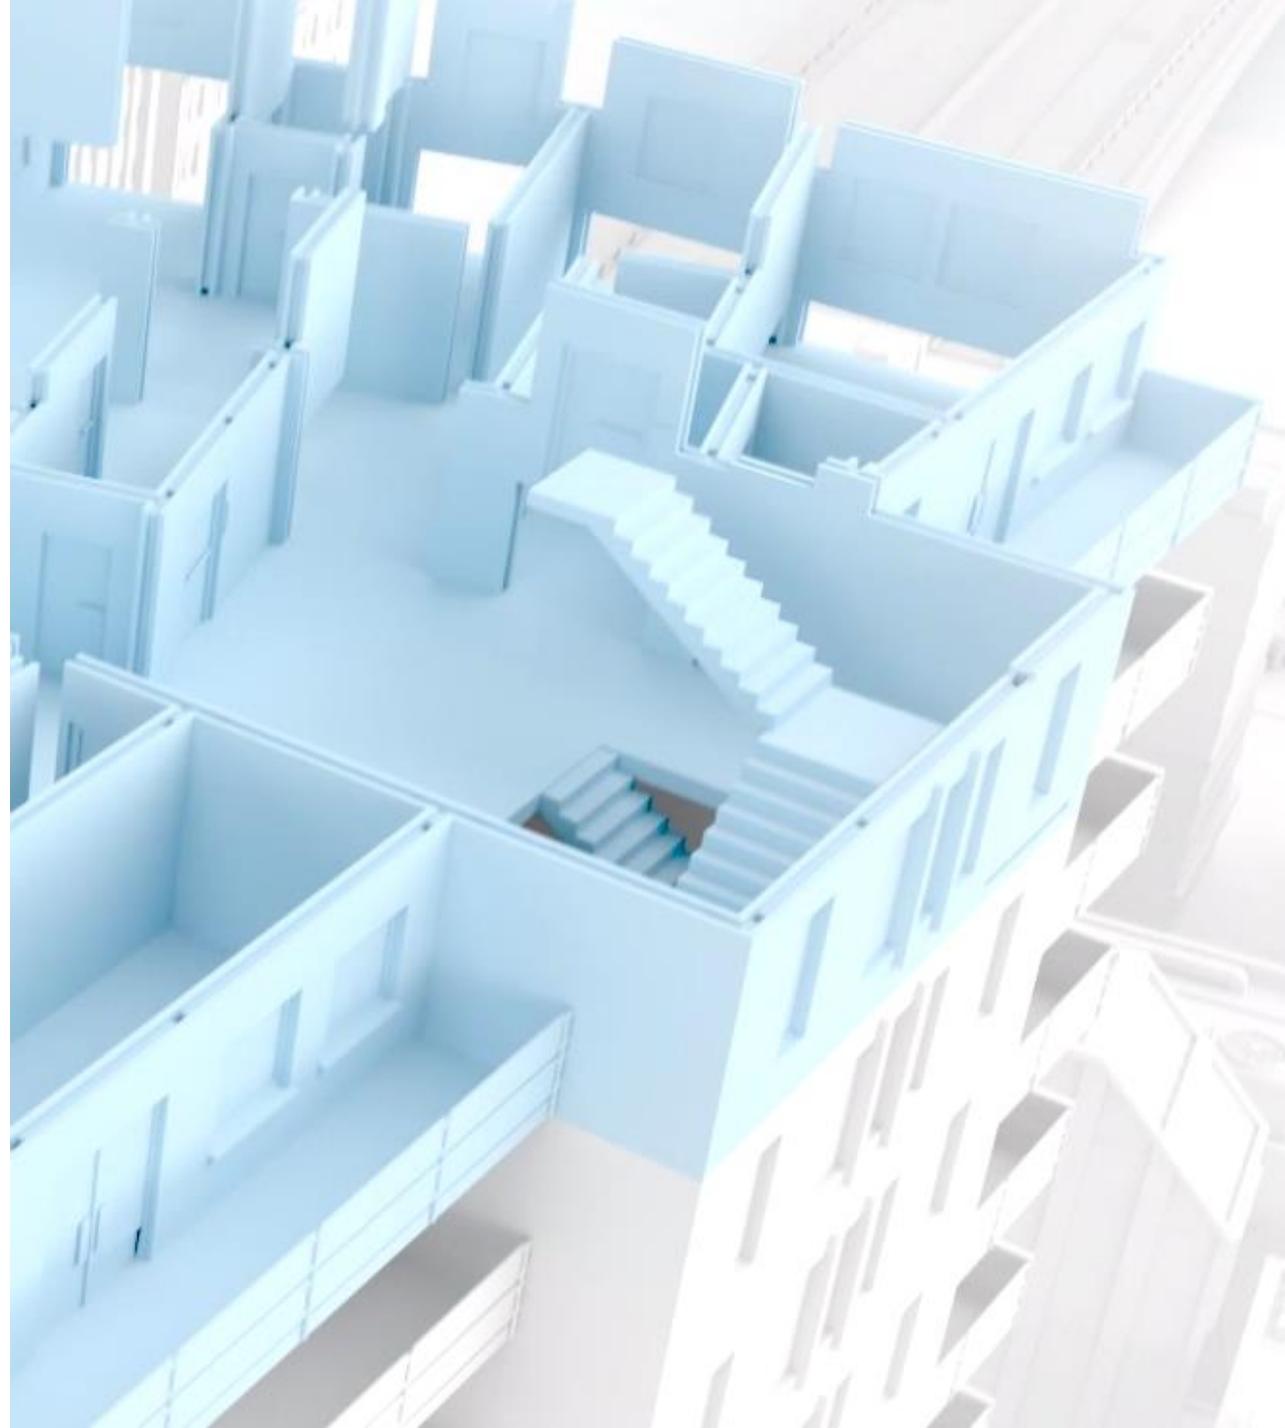

# \ DESIGN TO MANUFACTURE

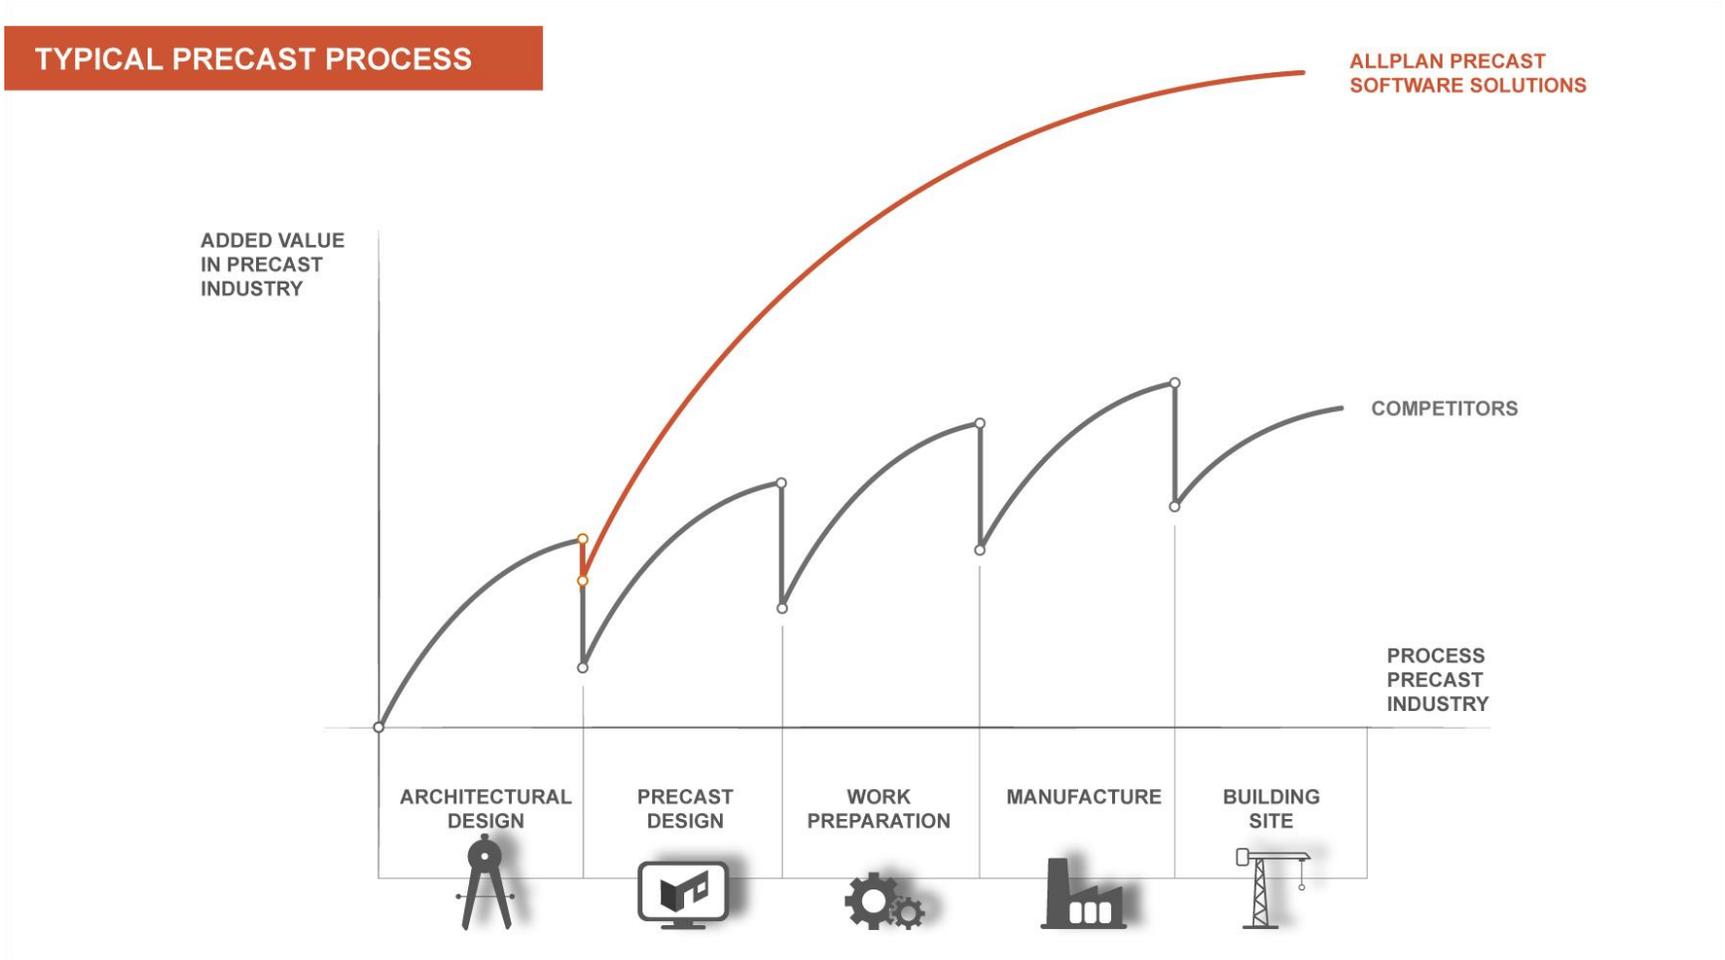

## Precast Fabricators | Structural Engineering/Detailing Offices

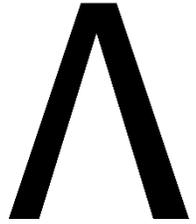

Precast construction, also known as industrialized construction or prefabrication, is one of the fastest growing segments in the construction industry. Success factors are exceptionally high quality, efficiency and plannability.

With the Precast portfolio, ALLPLAN offers OPEN BIM solutions for the successful design, planning and implementation of precast projects. It covers the entire process chain - from the *tendering model* to the *precast model*, *operations planning* and *stacking* to *quality-assured production data* and *commercial data*.

# \ TYPICAL PREFABRICATION PROCESS

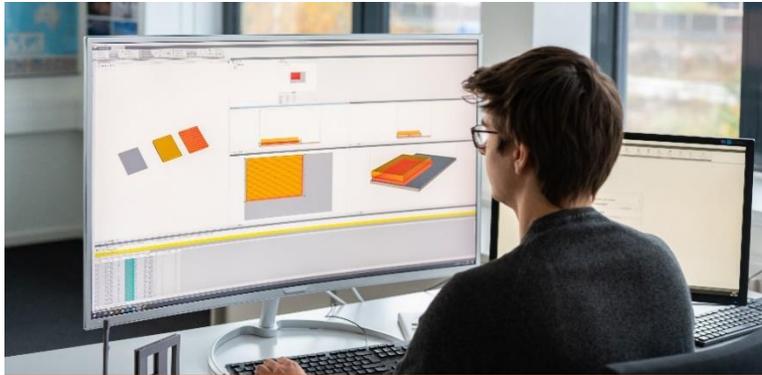

# REASONS FOR OUTSOURCING

...AND TYPICAL CHALLENGES

# \ WHY DO PRECAST MANUFACTURERS OUTSOURCE ENGINEERING SERVICES

## LABOUR SHORTAGE

Difficulties in finding skilled engineers

## TIME PRESSURE

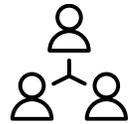

Not enough people internally to get the jobs done on time

## COSTS

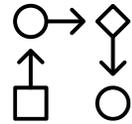

- › Project-based cost allocation
- › Wage level

# \ TYPICAL CHALLENGES: PROJECT MANAGEMENT

## Communication

- › Clear communication line & tools
- › Language
- › Time zones

## Workflow transparency

- › Process control
- › Project status monitoring
- › Timely risk detection

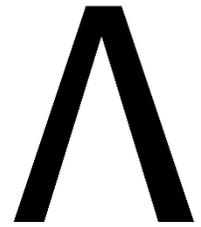

## Quality control

- › Knowledge transfer
- › Quality assurance

## Security

- › Confidentiality
- › Project Ownership
- › Data security
- › Intellectual property

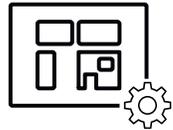

# PRECAST MANUFACTURERS' REQUIREMENTS

...TOWARDS ENGINEERS

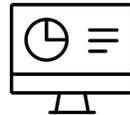

# \ PRECAST MANUFACTURERS' REQUIREMENTS

## EXPECTED DELIVERABLES

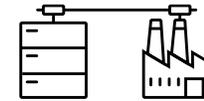

### Shop drawings

- › Workshop drawings for production
- › Elementplan PDF in 2D/3D

### ERP

- › Quantity take-off and material lists
- › Accounting information for elements

### MES

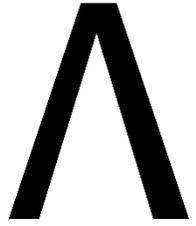

- › Production data for MES / plant control and machinery in specific formats

### BIM

- › BIM model with precast elements for collaboration with project stakeholders

Data quality, content and formats are defined and set by manufacturer and engineer

# SUCCESS FACTORS

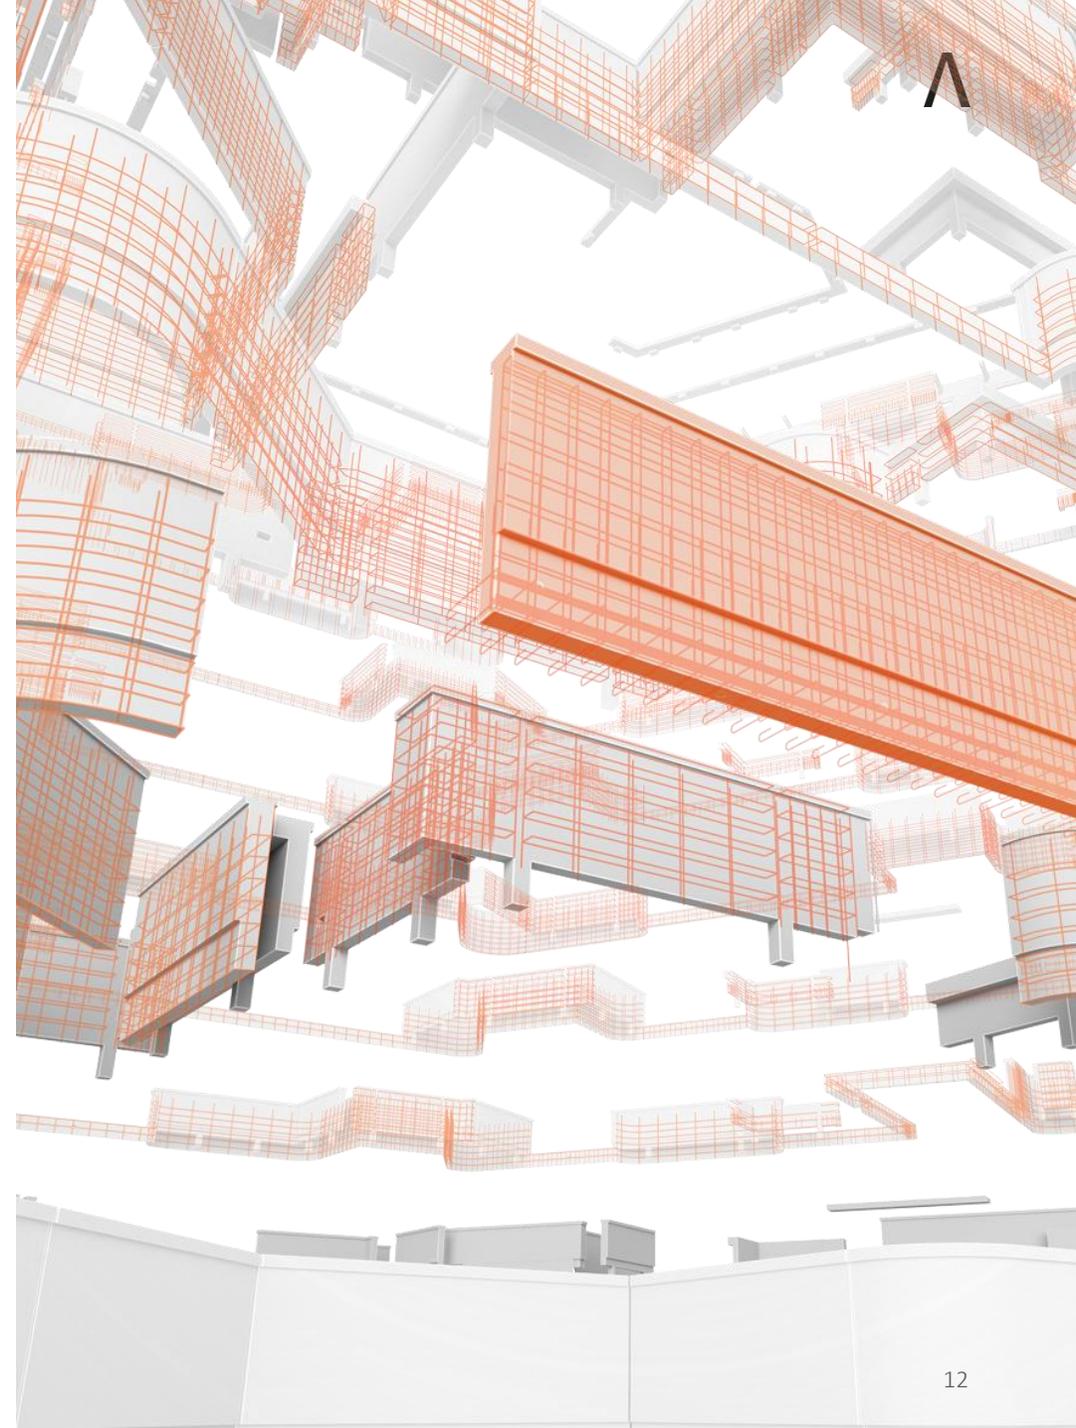

How the right software tools help  
you to outsource successfully

# \ EFFICIENT PRECAST DESIGN

## PLANBAR

Design precast elements highly efficiently and errorfree

- › Slabs | Hollowcore – Filigree – Concrete - Brick
- › Walls | Concrete – Sandwich – Double – Thermo - Brick
- › Structural precast elements | Bespoke elements
  
- › Design in 2D or 3D as you wish – the model and all shop drawings are 100% consistent at all times
- › Benefit from automated workflows
- › Create shop drawings including reinforcement, labeling and fixtures automatically

# \ SET YOUR DESIGN STANDARDS

## PLANBAR

Factory configuration

Project-specific standards

Element-specific settings

+ Design parameters

+ Reinforcement parameters

+ Naming, attributes etc.

**Configuration Menu**

Factory Selection

- wanden
- wanden\_attached
- vloeren
- structuur
- vloeren\_no\_attache

Select standard

- DE
- DIN 1045
- DIN 1045-1
- OEN-B4700
- EC 2

**Panel Type Catalog - Hollow Core Element**

General | Recesses 1 | Recesses 2 | Hollow blocks | Mounting hooks, lifting bolts | Insulation | Br

Created on:  Last modified:

Name:

Description:

Panel thicken:  mm

Max. panel length:  mm

Longit section:

End face section:

Standard panel width:  mm

Min. fitted panel width:  Mar

Max. fitted panel width:  mm

Position of cuts

Min. offset from cut to web:

Start:  mm

End:  mm

Insert Add Remove

OK Cancel

# \ SET YOUR DESIGN STANDARDS

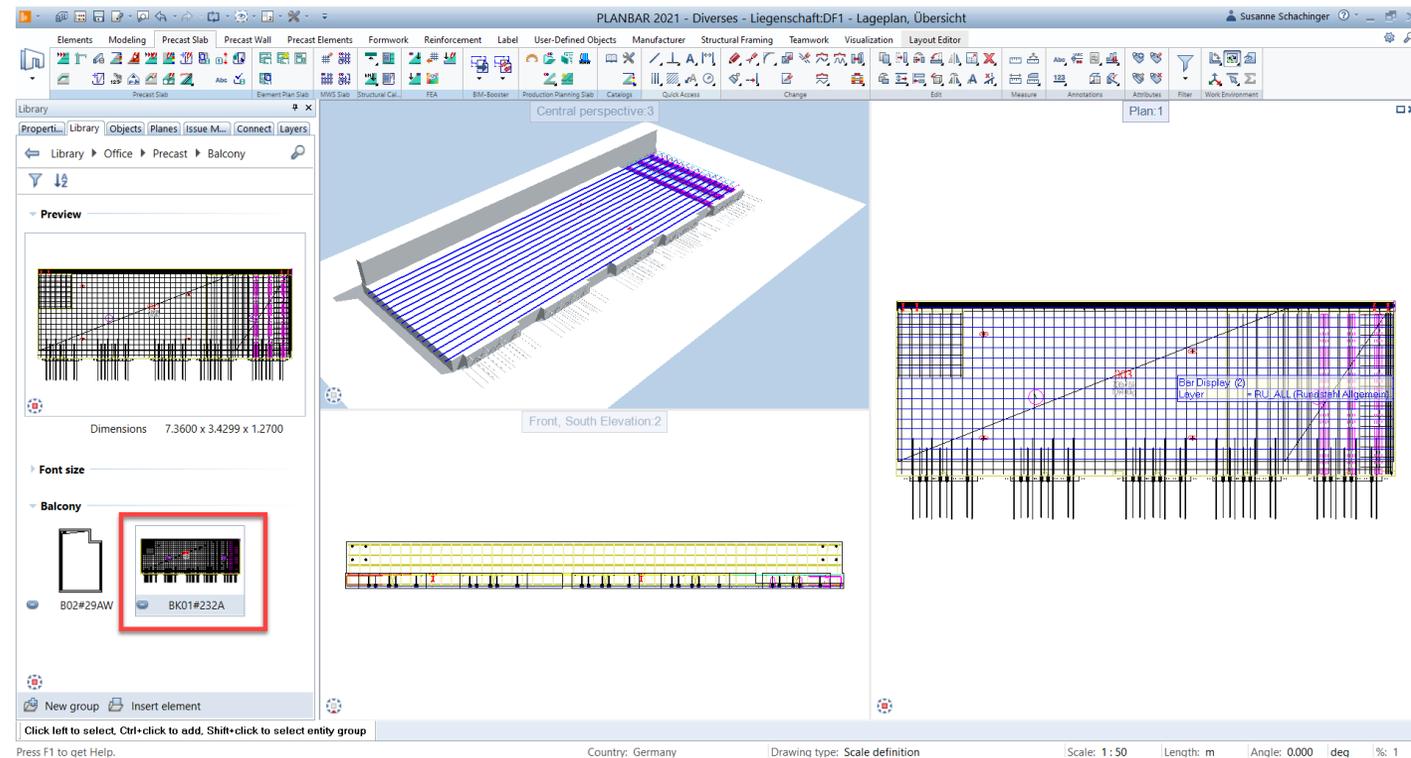

## PLANBAR

### Libraries

- + Fixtures / mounting parts
- + 2D / 3D objects
- + Python Parts & Visual scripting
- + Build your own element libraries

### Favorites

- + Use your own favorites for specific parameters

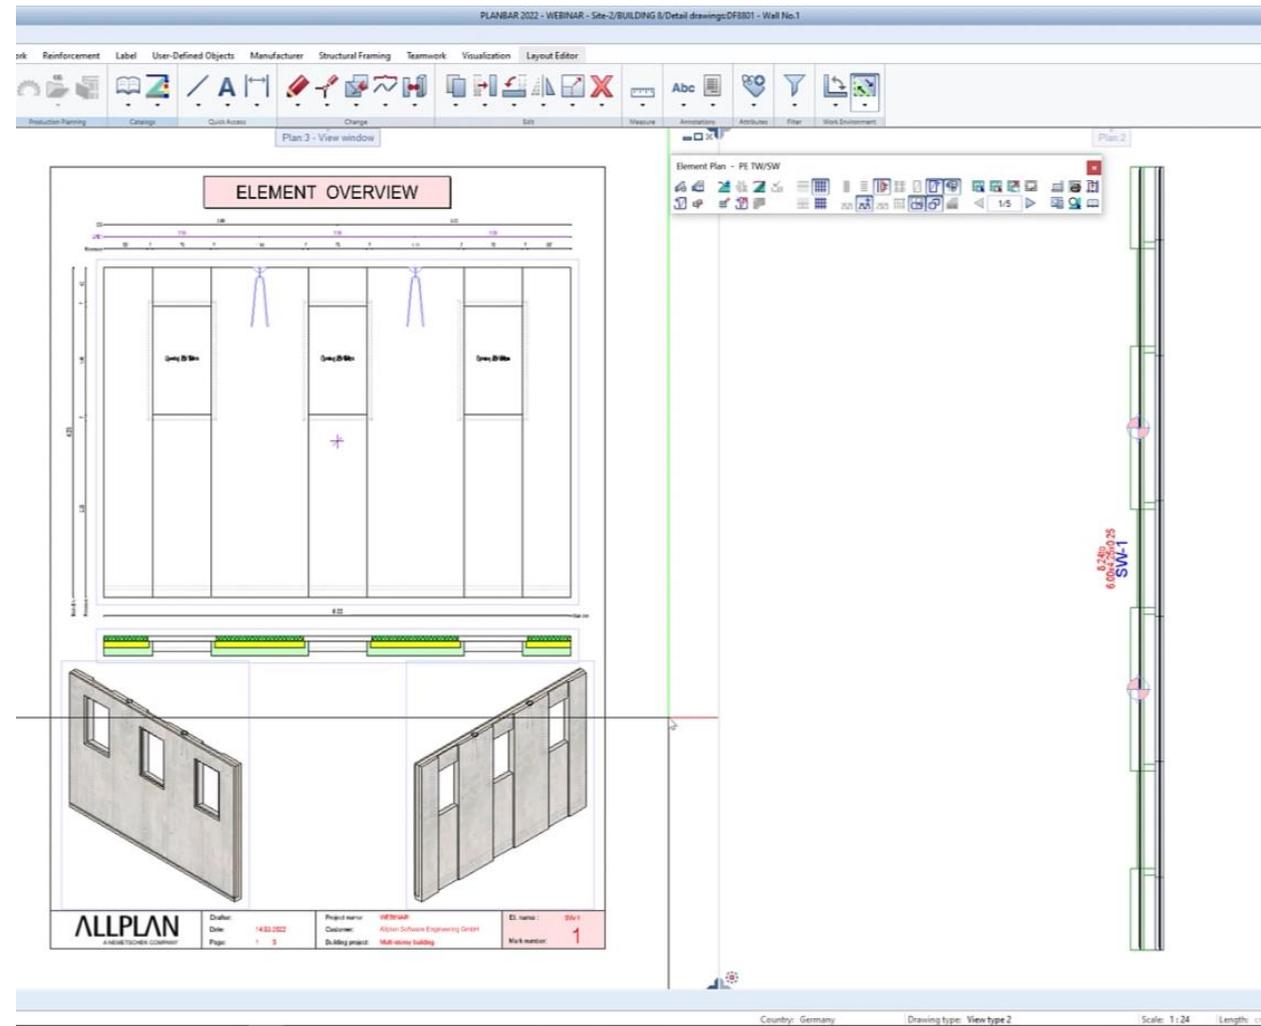

# \ SET YOUR STANDARDS FOR DELIVERABLES

## PLANBAR

### Drawings - Elementplan technology

- › The drawings are created automatically (including geometry, reinforcement, fixtures, dimensioning) based on your **templates from the layout catalog**
- › The 3D model and the element plans are always consistent

# \ SET YOUR STANDARDS FOR DELIVERABLES

## PLANBAR

### Data for ERP systems

- › Collect all volumes & quantities that need to be accounted for automatically
- › Proven standard file formats (xml, xls, text)

### Data for MES systems & plant machinery

- › Any desired combinations of plant components from various manufacturers
- › Consistent generation of information via the same interface
- › Proven standard file formats (UniCAM, PXML, IFC4precast)

# \ COLLABORATE INTELLIGENTLY

The use of a database-based system for interdisciplinary collaboration in construction projects can successfully overcome a number of challenges.

A central BIM platform of this kind serves to create a digital twin that enables better control over the progress of the project and makes the current data transparent to all project participants at all times.

Important decisions can be made earlier, errors can be avoided and thus the design and construction quality can be significantly increased.

[www.bimplus.net](http://www.bimplus.net)

# \ COLLABORATE INTELLIGENTLY

Open BIM project collaboration

Database driven

Merge, coordinate and analyze models in real-time

Cloud based for optimum accessibility

Access anywhere and anytime

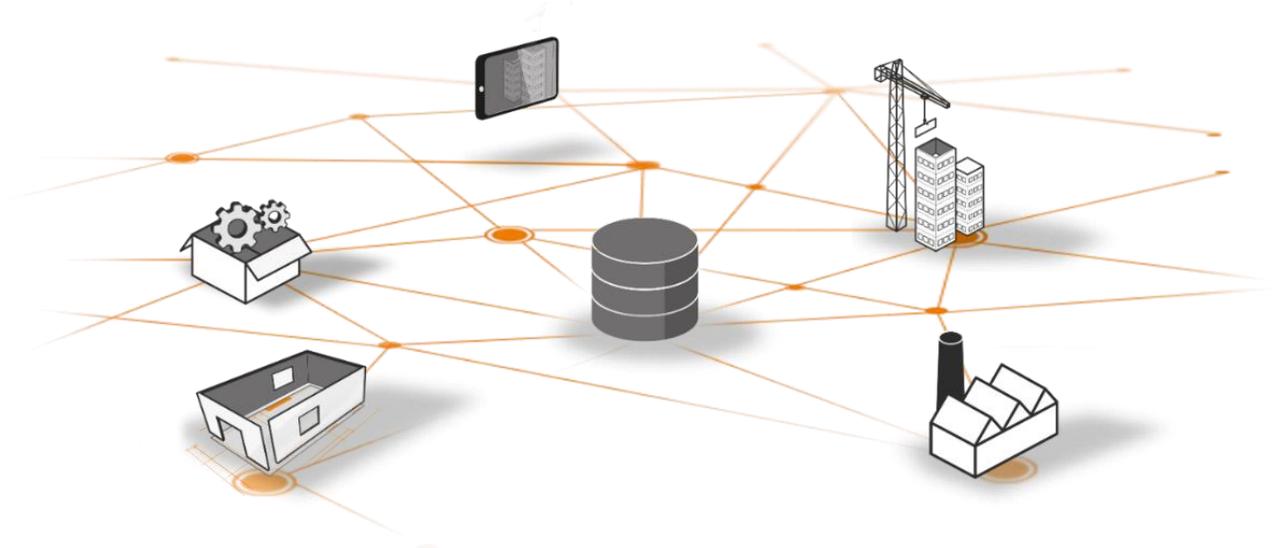

<https://www.bimplus.net/features>

# \ PREPARE FOR FABRICATION & DELIVERY

## TIM|WORK

- › Collect projects in a **central database**
- › External engineer sends only **1 file per project** update >> manage data easily
- › Mark element **status**
- › Implement an **approval** management

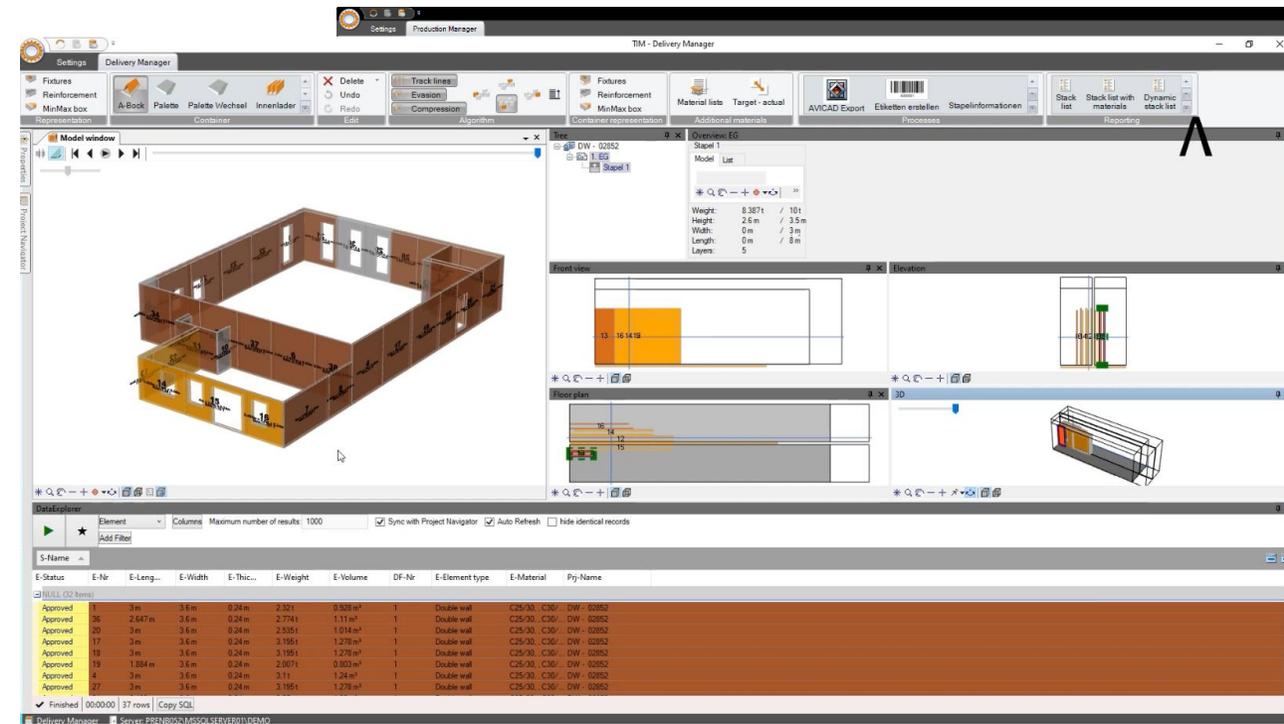

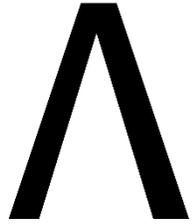

[Get to know Tim|work](#)

# \ PREPARE FOR FABRICATION & DELIVERY

## TIM|WORK

- › Perform **rule-based** quality checks on project and element level
- › Perform **operational tasks** (stacking, assembly and production planning)
- › Generate/print/forward **deliverables** – reports, lists, data for MES & ERP – on your own, **independent** from engineer's working hours

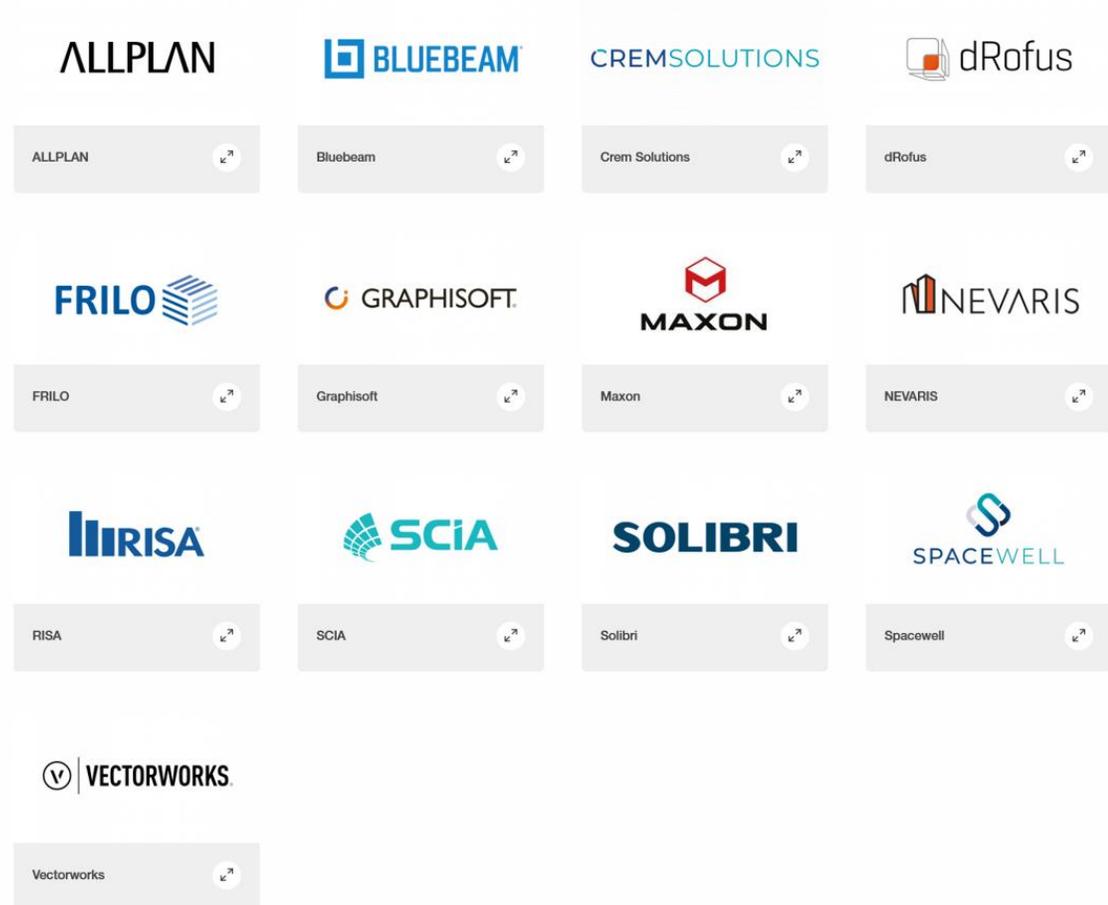

# ABOUT US

# \ ALLPLAN IS PART OF THE NEMETSCHKEK GROUP

For over half a century, the Nemetschek Group has been successfully driving forward the digitalization of the AEC/O industry:

The 13 brands of the Nemetschek Group offer software solutions for the entire lifecycle of buildings and infrastructure projects - from the design and visualization of a building to the actual construction process and building management.

# \ ALLPLAN IN NUMBERS

20

**Locations:**

International locations

600

**Employees:**

600 employees  
Worldwide

240.000

**Users:**

240.000 Users  
Worldwide

23

**Partner:**

23 strong technology partners  
Worldwide

# \ ALLPLAN PRECAST

## Competence Center Allplan Precast

- › ALLPLAN's specialists in precast construction
- › 30 years of experience in industrialized construction
- › > 600 Allplan Precast customers | > 4000 users worldwide

## **BENEFITS OF OUR SOFTWARE**

More efficiency, precision and flexibility for your precast projects

# \ WHAT WE BELIEVE IN

Industrialized construction  
with precast concrete is the  
**smart way** to build.

# ENGINEERING DAYS 2022

---

THE industry get-together for precast concrete specialists

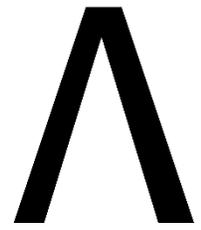

Expanding knowledge | Exchanging ideas | Networking

- › **When:** November 29-30, 2022
- › **Where:** Salzburg Congress, Austria
- › **How to register:** [Online registration](https://www.engineeringdays.at)

**Main topic:** Prefabrication in the new reality

- › Continuing shortage of skilled workers
- › Accelerated growth of the precast market
- › Sustainability in precast production
- › Increasing complexity of projects
