Manufacturing units:

Desining – project office

Building construction (monolit)

Precast concrete structures (columns, prestressed beams, TT plates, hollowcores, wall panels)

Steel structures

Aluminium structures – facades, doors, windows

Architectural-construction stone

Structural engineers

- Workshop designs
- New technologies

Architects

- Designing

Calculation

- Making offers

Mechanization

- Cranes
- Mixer trucks
- Mobile cranes

Equipment

- Formwork for walls and floor slabs

Mechanization

- Cranes
- Mixer trucks
- Mobile cranes
- Concrete plants
- Reinforcement plant

Equipment

- Formwork

Mucic – Spancrete Wall Panel production

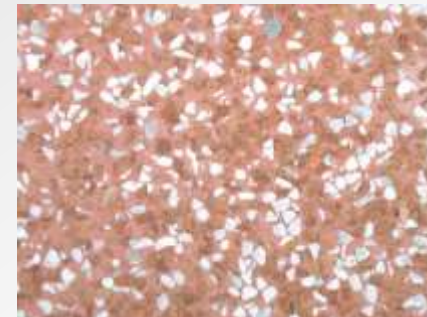

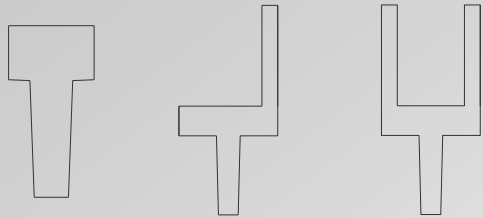

Finishing of the wall panel facade can be performed as natural concrete surface, washed aggregate, beaten natur concrete and finishes with a series of prints and other details

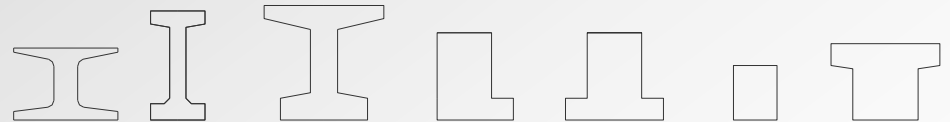

Characteristic crosssections of precast concrete elements (columns, prestressed beams, TT plates, hollowcores, wall panels)

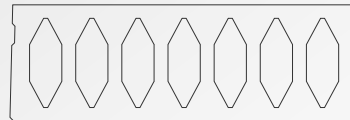

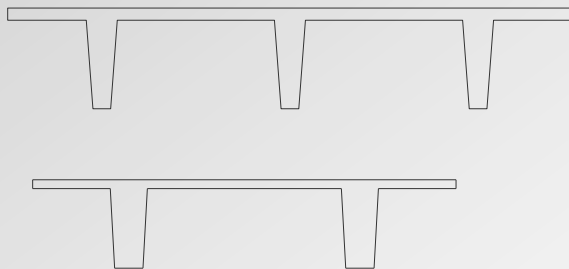

Roof beams

Floor beams

Planks

Aluminium facades

Thermo-glass production plant

Architectural-construction stone

Steel structures

- Instalation on the site

-Spatial frame structure

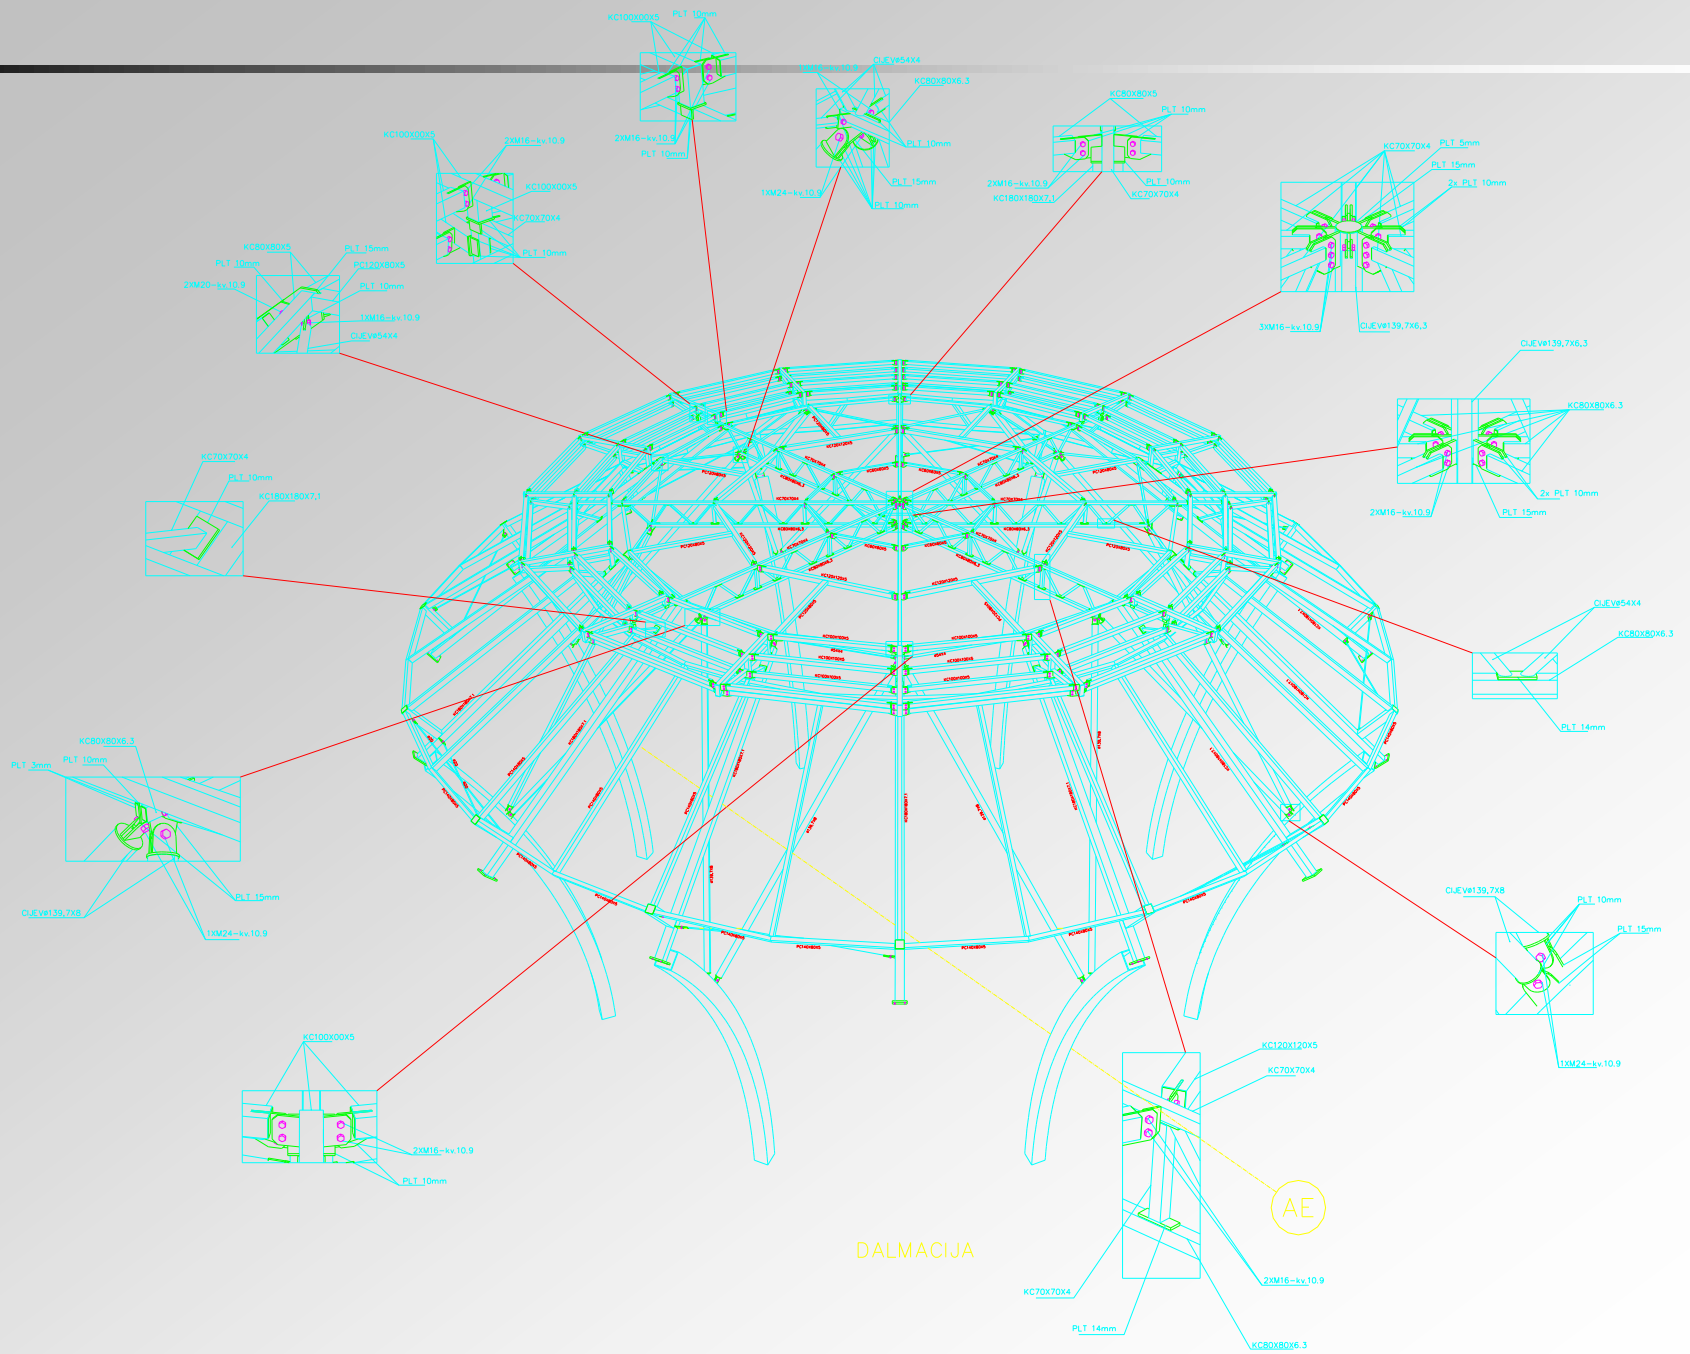

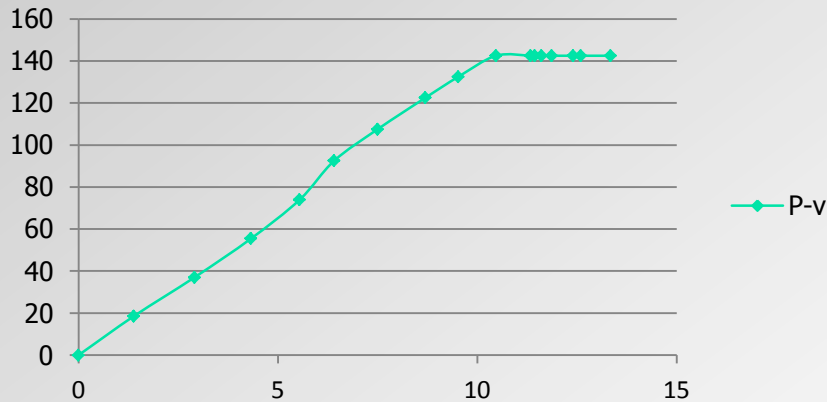

DALMACIJA

AE

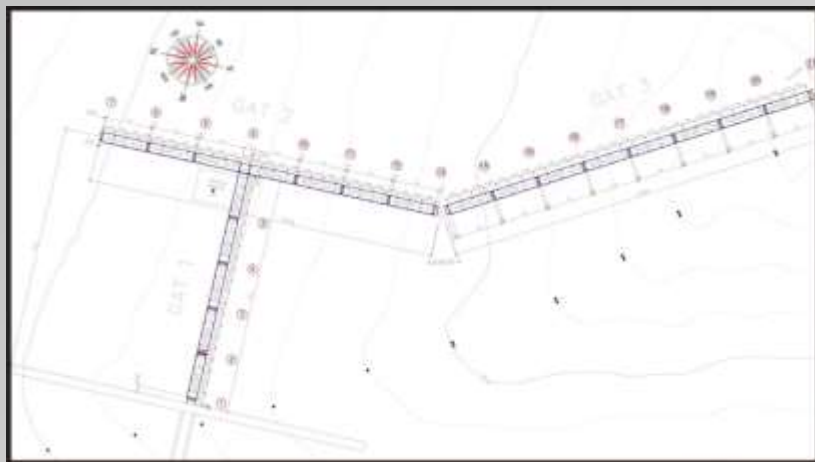

-Testing hollowcores 250mm depth,
lenht L=4m

Load P (KN) - displacement v (mm)

Marina "Frapa" -Rogoznica

The best marine in the world 2006.

Marina – Hotel Lav ”Le Meridien” - Split
