Pielisen Betoni Ltd.

Pielisen Betoni Ltd was founded by Esko and Eila Kolehmainen in 1973. But their story started a decade before when they founded Juuan concrete foundry in 1961. They had a dream to produce the best possible good quality ready-mixed concrete. This dream came true.

The year 1973 marked the beginning of a success story for this family business which continues to this day.

TODAY

Today Pielisen Betoni Ltd is still owned by the very same family. Eskos and Eilas children own the company 100% and continue to work with the same motivation and work ethic as their parents.

Today we are well-known for our quality products as well as our ability to always stay within the promised timeframe and our reliability in delivery. We deliver our clients with overall solutions which include carefully designed and produced products and services.

With the annual revenue of 27 million we are one of the biggest concrete product manufacturers in Finland today. We employ over 100 people in our factories every year. The key to our success lies in our professional and dedicated staff.

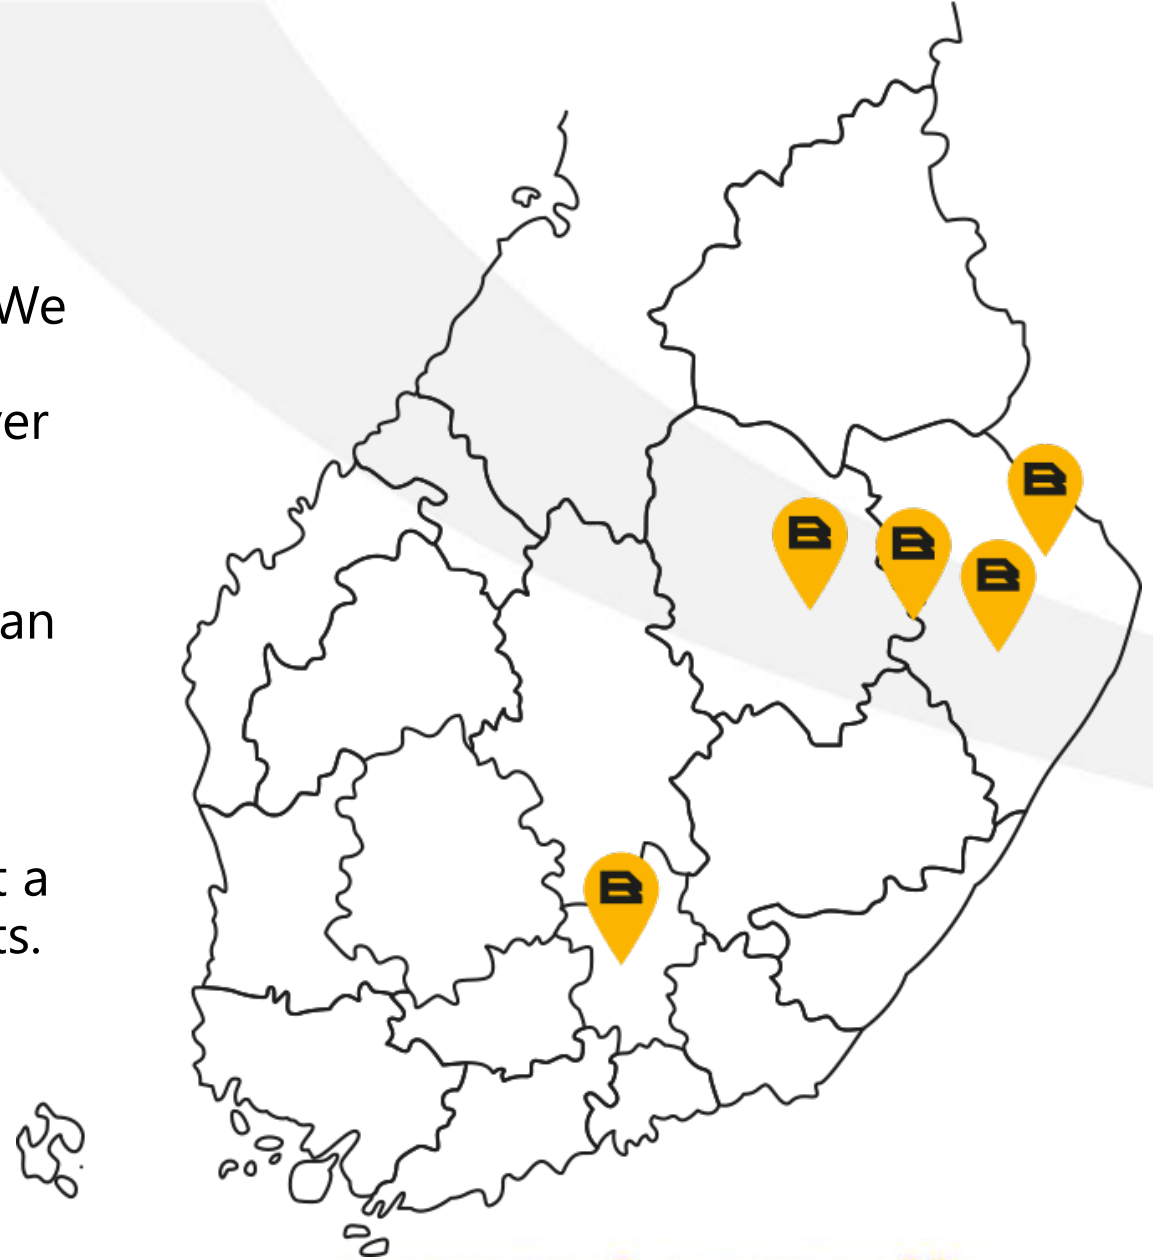

WE HAVE

We currently have 5 different factories in Finland. We are proud that our products are 100% produced in Finland and by our own staff. Our domesticity is over 90% of our annual revenue.

Our market sector being the whole of Finland we can offer our clients with best overall solutions.

By strict quality controls we ensure our clients with the best concrete products available. We have built a very strong and reliable relationship with our clients. We are proud to be a part of our client's constructions and we know that our quality will exceed our client's expectations.

OUR FACTORIES

Our factory in **Lieksa** is specialized in wall-element production.

Our factory in **Outokumpu** specializes in frame production. They produce pre-pressed beams columns, hollow core slab and shuttering slabs.

OUR FACTORIES

Both of our factories in **Kuopio** and **Joensuu** produce high quality ready-mixed concrete and deliver it to builders.

Our factory in **Hollola** is our slab factory which can produce large amounts of hollow core slab and shuttering slab to our clients in Southern Finland.

Sustainability

Our goal is to build always with long-term solutions. What we produce today will be visible for decades to come.

We feel responsible and want to improve our technology and expertise, to build an even better tomorrow. We combine our company's history and experience to today's standards and know-how.

Sustainable development is a huge part of our daily process. We recycle most of our excess concrete and re-use it as raw material.

We have invested in our factories so that our electric usage is more controllable and environmental. Our factories are updated so that the waste heat is reused within the factory creating less of environmental burden.

We are Pielisen Betoni.

**What we promise,
we keep.**
